SENECA VIEW KENNELS (CLASS B)

SENECAVILLE, OH 43780

Type: ATTEMPTED INSPECTION  
Date: Apr-16-2009

---

### 2.126 (a)

#### ACCESS AND INSPECTION OF RECORDS AND PROPERTY.

##### 2.126(a)

Access and inspection of records and property.

(a) Each dealer, exhibitor, intermediate handler, or carrier, shall, during business hours, allow APHIS officials:

- (1) To enter its place of business;
- (2) To examine records required to be kept by the Act and the regulations in this part;
- (3) To make copies of the records;
- (4) To inspect and photograph the facilities, property and animals, as the APHIS officials consider necessary to enforce the provisions of the Act, the regulations and the standards in this subchapter; and
- (5) To document, by the taking of photographs and other means, conditions and areas of noncompliance.

On Thursday April 16, 2009 at approximately 9:45am the Licensees facility was not able to be inspected for compliance with the Animal Welfare Act regulations and standards and to ensure the welfare of the animals.

A responsible adult must be made available to accompany the inspector on an animal welfare inspection.

Correct by: Correct Immediately

SENECA VIEW KENNELS (CLASS B)

Type: ROUTINE INSPECTION

Date: Dec-16-2008

SENECAVILLE, OH 43780

### 2.40 (b) (1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

2.40(b) Each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include: (1) The availability of appropriate facilities, personnel, equipment, and services to comply with the provisions of this subchapter.

The Pyrantel is expired 10/08.

The use of expired medications is not permitted in regulated animals. The use of expired drugs compromises the care of the dogs. This can affect their health and well-being.

Licensee must clearly label the Pyrantel as expired and segregate it from drugs being used on the dogs or dispose of the expired medication in an appropriate manner. Expired medications must not be used on regulated animals.

Correct by: Correct Immediately

### 3.1 (e)

#### HOUSING FACILITIES, GENERAL.

3.1(e) Storage. Supplies of food and bedding must be stored in a manner that protects the supplies from spoilage, contamination, and vermin infestation. The supplies must be stored off the floor and away from the walls, to allow cleaning underneath and around the supplies. All open supplies of food and bedding must be kept in leakproof containers with tightly fitting lids to prevent contamination and spoilage.

There are several bags of dog food sitting on the floor in the garage. Two of the bags are open with the top folded down.

Improperly stored food exposes the food to risk of spoilage, contamination and vermin infestation. This can reduce the palatability, nutritional value and quality of the food as well as expose the dogs to risk of disease hazards from vermin. This can affect their health, comfort and well-being.

Licensee must store unopened bags of food off the floor. Opened bags of food must be stored in a leakproof container with a tightly fitted lid to prevent contamination and spoilage.

Title:

## Inspection Report

---

Correct by: Corrected at time of inspection

### 3.3 (e) (1) (iii)

#### SHELTERED HOUSING FACILITIES.

3.3(e) Surfaces. (1) The following areas in sheltered housing facilities must be impervious to moisture: (iii) All walls, boxes, houses, dens, and other surfaces in contact with the animals.

The outside walls of the third building have wood where the painted coating has worn away. The wooden beams supporting the outside area of the enclosures has been weather worn exposing raw wood.

Surfaces that are not impervious to moisture make effective cleaning and sanitization impossible. This can expose the dogs to risk of disease hazards.

Licensee must repair, replace or resurface the affected areas.

Correct by: 15 June 2009

### 3.9 (b)

#### FEEDING.

3.9 (b) Self-feeders may be used for the feeding of dry food. If self-feeders are used, they must be kept clean and must be sanitized in accordance with Sec. 3.11(b) of this subpart. Measures must be taken to ensure that there is no molding, deterioration, and caking of feed.

Two of the feeders have a buildup or grime on the inside edges.

Feeders that are not cleaned on a regular basis exposes the dogs to risk of disease hazards and contaminated food.

This can affect the health and well-being of the dogs.

Licensee must thoroughly clean the feeder to remove all buildup. This must be followed by a thorough sanitization.

A regular schedule of spot cleaning daily if necessary and sanitizing at least every two weeks must be maintained.

Correct by: 23 December 2008

### 2.40 (b) (3)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

##### Section 2.40(b)3 ATTENDING VETERINARIAN / ADEQUATE VETERINARY CARE-

" daily observation of all animals to assess their health and well being.... that a mechanism of direct and frequent communication is required so that timely and accurate information on animal health , behavior and well being is conveyed to the attending veterinarian..."

\*\*\* There are two beagles, " Teah & Big Boy " housed in upper breeder kennel that have left ocular lesions ." Teah" has severe (buphthalmos) enlarged globe and a white opaque cornea .Big Boy has white opaque cornea. The owner stated that they had accidents with thorns during hunting.

There are no written health records documenting these injuries , treatments , with no date of the injury . No veterinary health diagnosis on the ocular conditions were documented by the licensee. A medical record is required on all injuries ,diseases, illness or behavioral problems.  
A medical record is absent.

\*\*\* a number of dogs have excessively long toenails This can lead to possible broke nails and lameness. Dogs need to have regular maintenance on nail trimming to avoid future health issues.

Failure to observe veterinary issues will lead to prolonged animal suffering and distress. Failure to communicate timely & accurate information on problems of animal health to the attending veterinarian will result in unnecessary suffering.

A veterinary exam is needed on these beagles by the attending veterinarian and appropriate documentation is needed as to the eye lesions.Correct all toe nails by clipping .

CORRECT All by February 18, 2008.

## Inspection Report

---

**2.50** (b) (1)

**TIME AND METHOD OF IDENTIFICATION.**

Section 2.50(b)1 RECORDS \_ a class "B" dealer shall identify all live dogs under his control on his premises. by affixing a official tag ... tattoo, approved chip ,

\*\*\*\*Two beagles, Teah & Big Boy have no USDA identification by the approved methods in section 2.50 (b) .These beagles must be identified as required by Section 2.50 (b)..

The lack of identification hinders inspections and makes tracking difficult. Proper identification of dogs is needed to rapidly trace animals in a potential disease outbreak.

CORRECT BY FEBRUARY 14, 2008.

**2.75** (a) (1) (iii)

**RECORDS: DEALERS AND EXHIBITORS.**

Section 2.75(a)1(iii) RECORDS - Dealers- " Each dealer shall keep , correctly disclose the following information...the vehicle license number and State and the driver's license number and State ..if she or he is not licensed under the AWA Act ."

\*\*\* there is one beagle "Teah " from an individual with no information on the vehicle license no and state and has no driver's license no and state recorded in the 7005. The records are incomplete.  
Accurate & complete records are needed to rapidly trace animals in disease outbreaks.

CORRECT FROM THIS DAY FORWARD.

Inspection and exit interview conducted with owner.

### 2.50 (b) (2)

#### TIME AND METHOD OF IDENTIFICATION.

2.50 (b) A class B dealer shall identify all live dogs under his or her control or on his or her premises as follows: (1) When live dogs are held, purchased, or otherwise acquired, they shall be immediately identified: (i) By affixing to the animal's neck an official tag as set forth in Sec. 2.51 by means of a collar made of material generally acceptable to pet owners as a means of identifying their pet dogs or (ii) By a distinctive and legible tattoo marking approved by the Administrator.

There is a female maltese and a male Pomeranian in the second building that are not properly identified. The maltese that was identified as Cindy on the APHIS Form 7005 is further identified with microchip number 095-895-363 but the chip could not be located on the dog. The Pomeranian is not listed on the APHIS Form 7005 at all. Failure to properly identify the dogs inhibits traceback to ensure that the dogs are sold as they are intended and in the event of disease outbreak.

Licensee must ensure that all dogs are identified as required by regulation.

Correct by: CORRECT IMMEDIATELY

### 2.75 (a) (1)

#### RECORDS: DEALERS AND EXHIBITORS.

(a)(1) Each dealer, other than operators of auction sales and brokers to whom animals are consigned, and each exhibitor shall make, keep, and maintain records or forms which fully and correctly disclose the following information concerning each dog purchased or otherwise acquired, owned, held, or otherwise in his or her possession or under his or her control, or which is transported, euthanized, sold, or otherwise disposed of by that dealer or exhibitor. The records shall include any offspring born of any animal while in his or her possession or under his or her control.

(i) The name and address of the person from whom a dog was purchased or otherwise acquired whether or not the person is required to be licensed or registered under the Act;

(ii) The USDA license or registration number of the person if he or she is licensed or registered under the Act;

(iii) The vehicle license number and State, and the driver's license number (or photographic identification card for nondrivers issued by a State) and State of the person, if he or she is not licensed or registered under the Act;

(iv) The name and address of the person to whom a dog was sold or given and that person's license or registration number if he or she is licensed or registered under the Act;

#### Prepared By:

Jan-23-2009

#### Received By:

(b)(6),(b)(7)(c)

Date:

Title:

Jan-23-2009

## Inspection Report

(v) The date a dog was acquired or disposed of, including by euthanasia;  
(vi) The official USDA tag number or tattoo assigned to a dog under Sec. 2.50 and 2.54;  
(vii) A description of each dog which shall include:  
(A) The species and breed or type;  
(B) The sex;  
(C) The date of birth or approximate age; and  
(D) The color and any distinctive markings;  
(viii) The method of transportation including the name of the initial carrier or intermediate handler or, if a privately owned vehicle is used to transport a dog or cat, the name of the owner of the privately owned vehicle;  
(ix) The date and method of disposition of a dog or cat, e.g., sale, death, euthanasia, or donation.

The licensee sold two male papillons at the January 17, 2009 dog auction. The dogs were identified as auction number 549 and 550. Both dogs born on 12/27/08 and registered with the CKC. Neither dog is listed on the Licensees APHIS Form 7005. Licensee stated that they were recently purchased but could not produce any record of purchase.

Licensees APHIS Form 7005 has 30 dogs listed as being active in the kennel. Kennel count was 31 dogs. Upon reviewing the identification on all dogs in the kennel it could only be determined that 22 of the dogs in the kennel match the recorded microchip id. Six of the dogs not listed include one male sheltie mc# 092-298-811, one female Pomeranian mc# 016-814-371, one female Yorkshire terrier mc# 086-812-547, one female cavalier mc# 096-016-066, one female Yorkshire mc#096-025-051, on male papillon mc#092-862-523. One female maltese had been give a mc# 096-029-287 however no chip was found while attempting to id this dog.

Failure to maintain accurate records inhibits tracebacks to ensure that the dogs where purchased from USDA licensed sources and in the event of disease outbreak.

Licensee must ensure that records are accurate and that all purchases of dogs are made from USDA licensed facilities (unless qualified for an exemption) and that accurate information on the seller is obtained.

Correct by: CORRECT IMMEDIATELY

### 2.80

#### RECORDS, DISPOSITION.

2.80 (a) No dealer, exhibitor, broker, operator of an auction sale, carrier, or intermediate handler shall, for a period of 1 year, destroy or dispose of, without the consent in writing of the Administrator, any books, records, documents, or other papers required to be kept and maintained under this part.

(b) Unless otherwise specified, the records required to be kept and maintained under this part shall be held for 1 year after an animal is euthanized or disposed of and for any period in excess of one year as necessary to comply with any applicable Federal, State, or local law. Whenever the Administrator notifies a dealer, exhibitor, broker, operator of an auction sale, carrier, or intermediate handler in writing that specified records shall be retained pending completion of an investigation or proceeding under the Act, the dealer, exhibitor, broker, operator of an auction sale, carrier, or intermediate handler shall hold those records until their disposition is authorized by the Administrator. Per the Licensees spouse, APHIS Form 7005 is being rewritten annually to keep the paperwork neater. Previous records are disposed of.

Regulation requires that all records be maintained for at least at least one year after it becomes inactive. Failure to

#### Prepared By:

maintain the records inhibits the ability to adequately track the dogs movement.  
Licensee must maintain all records for a minimum of one year after the dogs are gone.  
Correct by: CORRECT IMMEDIATELY

### 2.132 (d)

#### PROCUREMENT OF RANDOM SOURCE DOGS AND CATS, DEALERS.

2.132 (d) No dealer or exhibitor shall knowingly obtain any dog, cat, or other animal from any person who is required to be licensed but who does not hold a current, valid, and unsuspended license. No dealer or exhibitor shall knowingly obtain any dog or cat from any person who is not licensed, other than a pound or shelter, without obtaining a certification that the animals were born and raised on that person's premises and, if the animals are for research purposes, that the person has sold fewer than 25 dogs and/or cats that year, or, if the animals are for use as pets, that the person does not maintain more than three breeding female dogs and/or cats.

The Licensee obtained and sold at auction two dogs (Papillons) from an unlicensed breeder from Virginia. While discussing this the Licensee admitted that he knew buying from an unlicensed source was a violation of the regulations.

Failure to purchase dogs from USDA licensed breeders is a violation of the Animal Welfare Act. Purchasing from an unlicensed source inhibits the ability to effectively perform tracebacks in the event of disease outbreak and to be sure that the animals were acquired legally.

Licensee must only purchase dogs for USDA licensed facilities unless the seller qualifies for an exemption and certification is obtained.

Correct by: CORRECT IMMEDIATELY

### 3.11 (b) (2)

#### CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

##### 3.11 (b)(2)

Cleaning, sanitization, housekeeping, and pest control

3.11(b) Sanitization of primary enclosures and food and water receptacles. (2) Used primary enclosures and food and water receptacles for dogs and cats must be sanitized at least once every 2 weeks using one of the methods prescribed in paragraph (b)(3) of this section, and more often if necessary to prevent an accumulation of dirt, debris, food waste, excreta, and other disease hazards.

The doggie doors in the beagle enclosures have a heavy accumulation of grime.

The grime is caused by infrequent cleaning. Inadequate cleaning and sanitization exposes the dogs to risk of disease hazards and can affect their health, comfort and well-being.

Licensee must thoroughly clean the doggie doors to remove the grime. This must be followed by a thorough sanitization then clean water rinse to remove residue. A regular schedule of spot cleaning daily if necessary and sanitizing at least every two weeks must be maintained.

Date: Jan-17-2009

SENECAVILLE, OH 43780

### 3.18 (d)

#### TERMINAL FACILITIES.

3.18(d) Temperature. The ambient temperature in an animal holding area containing dogs must not fall below 45 [deg]F (7.2 [deg]C) or rise above 85 [deg]F (29.5 [deg]C) for more than four consecutive hours at any time dogs are present. The ambient temperature must be measured in the animal holding area by the carrier, intermediate handler, or a person transporting dogs who is subject to the Animal Welfare regulations (9 CFR parts 1, 2, and 3), outside any primary enclosure containing a dog or cat at a point not more than 3 feet (0.91 m) away from an outside wall of the primary enclosure, and approximately midway up the side of the enclosure.

Over night temperatures reached a low of -19 (negative nineteen) degrees F as documented on The Weather Channel . Upon arriving at the auction at approximately 8am the temperature was -9 (negative 9) degrees F. When entering the trailers it was observed that there were two running propane heaters, one at each end of the three trailers. The water bowls in the bottom level enclosures had solid ice in them. Temperature checks with the Raytek MiniTemp laser thermometer read 19 degrees when the beam was focused on food in the enclosures. Several of the water bowls on the second level of enclosures in the two outside trailers had ice in them. Temperature check with the Raytek read 22 degrees F. Dogs on the lower two levels were observed to be shivering and huddling together. All breeds represented were short haired breeds or recently clipped. Temperatures were again measured at 9am, 10am, 11:15am and approximately 12:30pm. The ice never melted in the lower level enclosures and those dogs continued to huddle together and shiver. Temperatures rose to 31 degrees F on the lower level and to 47 degrees F on the second level. Upper level temperatures rose to 66 degrees F. Several areas of the perimeter of each trailer had ice on the walls and floor.

Dogs being housed in a terminal facility must be maintained at no lower than 45 degrees F for their health, comfort and well-being. Temperatures were monitored over a 4 hour period that began when the water bowls were already frozen over. Not once on the lower level did the temperatures rise above freezing. There were two enclosures with frozen water that never warmed above the freezing point despite being within two feet distance to a propane heater. Licensee must take steps to ensure that minimum temperatures of at least 45 degrees F can be maintained in any enclosure that contains a dog. During weather extremes additional sources of heat must be used.

Correct by: Immediately

### 3.18 (d)

#### TERMINAL FACILITIES.

3.18(d) Temperature. The ambient temperature in an animal holding area containing dogs must not fall below 45 [deg]F (7.2 [deg]C) or rise above 85 [deg]F (29.5 [deg]C) for more than four consecutive hours at any time dogs are present. The

ambient temperature must be measured in the animal holding area by the carrier, intermediate handler, or a person transporting dogs who is subject to the Animal Welfare regulations (9 CFR parts 1, 2, and 3), outside any primary enclosure containing a dog or cat at a point not more than 3 feet (0.91 m) away from an outside wall of the primary enclosure, and approximately midway up the side of the enclosure.

Over night temperatures reached a low of -19 (negative nineteen) degrees F as documented on The Weather Channel .

Upon arriving at the auction at approximately 8am the temperature was -9 (negative 9) degrees F. When entering the trailers it was observed that there were two running propane heaters, one at each end of the three trailers. The water bowls in the bottom level enclosures had solid ice in them. Temperature checks with the Raytek MiniTemp laser thermometer read 19 degrees when the beam was focused on food in the enclosures. Several of the water bowls on the

second level of enclosures in the two outside trailers had ice in them. Temperature check with the Raytek read 22 degrees F. Dogs on the lower two levels were observed to be shivering and huddling together. All breeds represented were short haired breeds or recently clipped. Temperatures were again measured at 9am, 10am, 11:15am and approximately 12:30pm. The ice never melted in the lower level enclosures and those dogs continued to huddle together

and shiver. Temperatures rose to 31 degrees F on the lower level and to 47 degrees F on the second level. Upper level

temperatures rose to 66 degrees F. Several areas of the perimeter of each trailer had ice on the walls and floor. The water bucket used to fill the dogs water bowls was frozen solid.

Dogs being housed in a terminal facility must be maintained at no lower than 45 degrees F for their health, comfort and

well-being. Temperatures were monitored over a 4 hour period that began when the water bowls were already frozen over. Not once on the lower level did the temperatures rise above freezing. There were two enclosures with frozen

water

that never warmed above the freezing point despite being within two feet distance to a propane heater.

Licensee must take steps to ensure that minimum temperatures of at least 45 degrees F can be maintained in any enclosure that contains a dog. During weather extremes additional sources of heat must be used.

Correct by: Immediately

### 3.18 (b)

#### TERMINAL FACILITIES.

3.18(b) Cleaning, sanitization, and pest control. Terminal facilities must follow an effective program in all animal holding areas for the control of insects, ectoparasites, and birds and mammals that are pests to dogs.

There was a bird nest built on top of the first upper kennel in the first holding trailer.

Birds left to nest in the holding trailers increase the risk of disease hazards and contribute to pest infestations. This can affect the health and comfort of the dogs.

Licensee must remove all bird nests prior to next auction.

Correct by: Corrected at time of inspection
